You must be off the premises by 3 PM

A buzzing, tiny engine prickles in your ear, and you make out a flying creature made of glass and metal, emitting tiny puffs of steam. Or maybe that's an actual cicada, playing around your ears on a summer's day.

And all around you?- a machine, a sunny testament to human ingenuity; a space where many parts move in perfect coordination, where the gears turn on a well-oiled lube of love and imagination. But can a thousand little gears all work together? Can the pieces of this puzzle fall into place, as though some quantum magic runs the universe? Is there a line between the man-made and the "natural?"- where the drum machine ends, and the sound vibration that travels through organic spheres begins?

There's but one way to know the answer.
Be a part of the fabulous contraption

THE S. S. PANDEMONIUM

“Welcome aboard the SS Pandemonium!

**Cruiser of distant galaxies and
purveyor of exotic wares.”**

(FROM A RECRUITMENT POSTER
NEARLY 9,603 EARTH-YEARS OLD)

Long long ago, The Pandemonium was separated from its mothership, The Conundrum, during a much needed cleaning operation after transporting a particularly surly and over-fed batch of Cydurian moon-skinks. The amount of cheap booze that was added to their drip bottles to “help with packing” did nothing good for the mess when they came to.

The Pandemonium was totally evacuated due to the high levels of raw alpha particle radiation needed to sanitize the disaster and had been parked in orbit for 10 years to “dry out” before it was safe to attempt a carbon based crew.

During this time the AI system that operated the ship frankly grew fond of “alone time” and later on, when she had the chance, would happily maroon a crew somewhere nice(ish) and drift through the cosmos for a while until she got bored and started sending out messages from a fake shipping tycoon until she hooked another sucker into being Captain and he or she or it or ‘peep’ would lead another crew aboard the SS Pandemonium.

Recently her travels have led her to our system and she has expressed interest in this Man-Burning thing. We keep correcting her but she seems to think it’s funny. At any rate, she has plans to hit other events before crashing ttitd, but we have her here. She’s interested in taking on crew as well. If you can light the burners perhaps she’ll consider you. Bring your forms in triplicate on canary, yellow and goldenrod if you want to try the engines. Remember; Triplicate, this isn’t bureaucracy, this is Civilization

SOUND AT LAKES OF FIRE

Amplified sound is an integral part of Lakes of Fire. Artistic expression through the medium of sound is highly encouraged and appreciated by the Lakes of Fire community and organization, provided it does not threaten the event as a whole. Unfortunately, the cumulative and far-reaching effects of sound can potentially endanger Lakes of Fire's continued presence at any particular location.

Beginning this year for the 2015 event, all participants bringing amplified sound are required to sign a Sound Agreement and display a Sound Permit prominently by their sound source.

The Sound Team will be monitoring and working with sound camps throughout the event, and infractions will be marked against the permit & logged for future use.

The 2015 LOF Sound Permit in all it's glory.

DAILY TURNDOWN TIMES:
WEDNESDAY NIGHT: 11PM
THURSDAY NIGHT: 11PM
FRIDAY NIGHT: 2AM
SATURDAY NIGHT: 2AM
90 DB @ 40 FEET / NO SUBS
SUBWOOFERS RESUME AT 10 AM

NOTE: These limits can change at any time, for any reason, as dictated by the Sound Team and/or the GLEA Board.

Enforcement Procedures AKA The Three Strikes Rule

STRIKE ONE:

A friendly chat to make sure that you know where your levels should be, as well as a reminder of the new policy and how it will be enforced; Please, respect the limits that are put in place to protect the community and the event.

STRIKE TWO:

A stern warning; we know you are well aware of the policy, as well as where your levels should be and how to keep them there. You deliberately violated it, putting the event and community at risk. Please, for everyone's sake, do not let it happen again.

STRIKE THREE:

Regardless of intention, you and your sound system are a problem. The Rangers and Board will be informed that your system is to be powered off for the remainder of the night. Additionally, since you have proven to be incapable of self-managing your volume, subsequent Turn Down Times will be Turn Off Times for your camp/mutant vehicle/project. You have lost late night sound privileges for Lakes of Fire 2015. Shame on you! Boo.

Repeating for emphasis: A third infraction on any given night will result in losing Late Night Sound privileges for the duration of the event!
